Inauguration and Guest Speech

With the encouragement and support from The Principal sir, The Hod and The Coordinators and Most The Students of Department of Computer, IT, Grow More Faculty of Engineering & Grow More Faculty of Diploma Engineering, Himatnagar organized on “*Code Hunting*” on 19th March 2021 at 09:15 AM. Around **35 Participants and 50+Audiance** comprising of Students, Professors, Assistant Professors and coordinators participated in this celebration. The event started with an inaugural address by **Prof.Tushar Pokar**, in Guidance with **Prof.Bharat Suthar** (Principal), **Prof.Chetan Patel (HOD MBA)** with Presence of **Prof.Anjuman Ranavadiya** (IT HOD), Prof.Mehul Patel (Civil HOD), **Prof. Meghal Prajapati** (CE HOD).

Prof.Bharat Suthar (Principal) made students encouragement and explained the importance of the practical in now days , he explained actually definition of Engineer.

Prof.Chetan Patel (HOD MBA) said about the Market demand about the Software industry and that even no any recession effect in IT Industry in this pandemic situation.

Introduction

The Code Hunt is an educational coding game for teaching and learning computer science at scale. The game consists of a series of levels, which get increasingly challenging. In each level, the player has to discover a secret code fragment and write correct code for it. The game has sounds and a leader board to keep the player engaged. Code Hunt targets students from introductory to advanced programming. In addition, . At the core of the game experience is an automated program analysis and grading engine based on dynamic symbolic execution. The engine detects any behavioral differences between the player's code and the secret code fragment. The game works in any modern browser, and currently supports C or Java programs.

The Round and Rules as below.

Round -1 : Code Quest (c language only)

1. In this round few line code is given to participant with errors. Participant have to solve that error and compile ,run the code...

Round -2 Code Storm (C or C++ or java)

• In this round we will provide logical problems to the participants and consequently they are required to write computer program using C , C++ , or java.

Round -3 Blind Coding (C language only)

- Round 2 winner will enter into this round.
- In this round one program definition is given to the participant (in C language only).participant have write the code with monitor off.
- In case of tie in numberof errors then timing will be considered.

Winners

The list of event’s medal, Certificate and Cash winners at

1. Patel Darshil Mehulkumar
2. Chauhan Ridhdi
3. Shah Labdhi
